Brolga Homes Pty Ltd Port Douglas comes to the Territory

Resort-style living and climate-friendly design go hand-in-hand in Brolga Homes Pty Ltd's Port Douglas home.

The home design has achieved an energy assessment rating of 7.1 stars, far 'friendlier' than the 5 stars required to build in major southern cities.

Passive solar design is used to keep the sun off windows. A swimming pool in the 'core' of the home creates cooling breezes in the living areas. The landscaping features native plants and garden beds were mulched with waste gyprock.

The Port Douglas has already won a number of Northern Territory awards, including the Housing Industry Association's Greensmart Energy Efficient Housing Award.
