INTRODUCTION AND DISCLAIMER

This Power and Water Approved Underground Materials List (“Approved Underground Materials List”) provides details of approved materials, as well as their current known manufacturer(s) and the manufacturer(s) part number for these items. Those purchasing materials that will be connected to the Power and Water owned and operated underground electrical network shall purchase only these approved products from any supplier of the respective approved manufacturer(s) on the list.

Power and Water may in its absolute discretion amend this Approved Underground Materials List in any circumstances, including but not limited to, product recalls, safety concerns, product availability, changes in the manufacturer designs and changes in Power and Water Standard Drawing designs. Power and Water may limit the number of manufacturers on the Approved Underground Materials List at any time in accordance with ACCC notification N97706.

Manufacturers who wish to have an item added to the Approved Underground Materials List may make written submissions to the manager Asset Quality and Systems. Submissions must include, as a minimum, the following documentation:

- Compliance with PWC Network Standards and specification.
- Compliance with Australian and international Standards, Copies of test reports are required.
- Current NATA or equivalent accreditation of the testing facilities.
- Current ISO quality accreditation of design and specific manufacturing facilities.
- The environmental and occupational health and safety (OHS) impacts of the material or equipment.
- Warranty and guarantee.
- Life cycle cost associated with the material or equipment.
- Technical performance requirements (electrical, physical, structural, mechanical) and any unique requirements.
- Cost of energy losses.
- Interchangeability and compatibility with other PWC materials and equipment and implication for spare holdings.
- Drawings (electronic CAD, pdf).
- Model/parts Numbers (including spare parts).
- Material Data/ Safety Sheet/ testing results/ certificates.
- Special handling procedures.
- Installation Procedures.
- Maintenance Procedures.
- Training requirements and programs.
- Reference list of other Australian utilities that are using this product.
- UV Resistance.
- Expected lifespan.
- Methodology to ensure continuity in supply.
- General Trading Terms and Product Return Policy.
- Unit cost.

Further documentation and/or factory audits may be required; this will be advised in due course.

PWC is under no obligation to review any submission. PWC will determine in its absolute discretion whether to approve material submitted. Approvals are given for a 3 year period and it is the manufacturer’s or their representative’s responsibility to renew the relevant approval.
