

Elizabeth River closures

Waters of the Elizabeth River will be closed intermittently, pursuant to Section 51 of the *Ports Management Act*.

When

Between Monday 24 July and Friday 15 September 2017, intermittent closures will take place at various times.

Closures will operate as a stop/go arrangement, allowing boats to pass through the area when safe to do so.

The affected area

The affected area is down stream of the Palmerston Boat Ramp, from the overhead power cable crossing and as far as the overhead cable special buoy. See approximate area above.

Authorisation

The Regional Harbourmaster has approved and directs that entry into and transit through the closed waters is prohibited to all persons and vessels except the Northern Territory Police, authorised Power and Water employees and those vessels and persons authorised by the Power and Water patrol boat.

Why closures are necessary

Closures are necessary to allow Power and Water contractor, Downer Group, to safely replace high voltage overhead electricity cables crossing the Elizabeth River.

To ensure your safety and a safe work area please follow all directions given by boat ramp traffic control and Power and Water patrol boat staff.

More information

To locate alternative boat ramps in the area go to nt.gov.au/marine/for-all-harbour-and-boat-users/find-a-boat-ramp
