

## **PRECAUTIONARY ADVICE FOR DRINKING WATER (BOIL WATER ALERT)**

---

### **ADVICE No. 1**

**Community: Bulla**

**Time: 12.00      Date: 19 June 2019**

---

Power and Water Corporation has advised the Department of Health that the water disinfection system at Bulla community is not functioning properly this may affect the quality of the water supply at Bulla Community

Power and Water Corporation is investigating the problem and carrying out work to fix the problem. The water supply in Bulla will be tested to ensure that the water is safe to drink.

In the meantime and to be on the safe side the Department of Health recommends that water for drinking, making food and cleaning your teeth is obtained from either packaged bottled water or by bringing tap water to the boil and allowing to cool prior to use.

The Department of Health will advise on the removal of this precautionary advice once they have received advice that the water supply system is fully operational and the water is safe to drink.

Anyone who has concerns can contact the Department's Environmental Health hotline on 1800 095 646 during business hours.
