

Design and Certification Application for Accreditation

Please complete all fields - Incomplete applications will result in delays.

Applicant details

Name Phone

Email Mobile

Employer name

Type of accreditation

Please note: The accreditation for design and certification belongs to the individual, not the company/business. Full details of the different categories can be found on page 12 of the [Power and Water Hydraulic Contractor and Consultant Accreditation Guidelines](#)

Design

Building development: Yes No Land development: Yes No

Certification

Building development: Yes No Land development: Yes No

Are you based in the Northern Territory (NT)? If not, in which state are you based?

All applicants are required to be present for mandatory start up and handover inspections. You must also be able to demonstrate, witness and hold point inspections compliance if working remotely (e.g. Not in the NT or not in the town/community the project is located).

Applicant qualifications

Please attach to the application copies of relevant qualifications that may include degrees, other accreditation, CAL ratings, quality assurance status, particular skills, qualifications and expertise, safety management plans, environmental management plans and hazard management plans.

Please attach to the application details of relevant experience in hydraulic works.

Last three projects

Please attach details of your last three hydraulic projects to this application and include:

- Name of project
- Dates of the works
- Detailed description of the works
- Referee contact details including phone and email (see below)
- Performance review of the project (if available).

Referee details

Please ensure that prior to submitting your application you contact your nominated referees to let them know about the application and that they are happy to provide us with this information. Failure to do this may result in delays in processing the application.
