

Secure System Guidelines Section Order Changes

Draft 3.2 to Version 4

The order of sections in the Secure System Guidelines was adjusted when issued as Version 4 final to improve readability of the document.

Draft 3.2 Section #	Version 4 Section #	Section Name
1	1	Scope
2	2	Definitions
15	3	Adoption of Reliability Criteria for networks
3	4	Determining Base Capacity
10	5	Determining adequate frequency levels
6	6	Regulating Frequency Control Ancillary Service (R-FCAS)
5	7	Inertia Frequency Control Ancillary Service (I-FCAS)
7	8	Contingency Frequency Control Ancillary Service (C-FCAS) / Spinning Reserve
11	9	Determining adequate energy for the System
4	10	Determining Standby Reserve
14	11	System stability
8	12	Determining adequate voltage levels for the System
9	13	Determining adequate Reactive Power Reserve for the System
13	14	Determining fault level requirements
17	15	Determining adequate protection integrity
12	16	Determining capacity of transmission assets
16	17	Power system outage planning
20	18	Black Start and System Black Restart procedures
18	19	Generator and Load Registration Thresholds
19	20	Special Control and Protection Requirements or Schemes
21	21	Records
22	22	Document History

These changes order the document such that most references to other sections are referencing sections earlier in the document rather than later. This change is not intended to be interpreted as an ordering of importance of sections or any other quantitative/qualitative change.
