

That's my Water!

Real-world water sustainability learning

More than 4800 students and 37 schools have participated in That's My Water! since 2016. The program invites students and schools to work alongside Power and Water's STEM professionals to address the issue of water sustainability in the Northern Territory. It offers students an outstanding educational experience, tailored to age and location.

2024 That's My Water! programs

Program	Year level	Term
That's My Water! Darwin	5/6	3
Darwin Water Challenge	7	2 or 3
That's My Water! Bush schools	Flexible	All years

"I can't speak highly enough of this program. Our students got to see firsthand that there are local organisations nearby offering careers and jobs in areas they themselves are passionate about. It's an invaluable experience – any exposure to career pathways is a vital part of inspiring our young people and setting them up for success."

Noella Goveas – Principal, Millner Primary School

Learning areas across science, geography and art are brought to life with real world challenges that empower students to participate actively and enthusiastically in developing solutions for the future.

Benefits for students

- Curriculum-aligned learning
- Engaging STEM program
- Exposure to real-world, local career pathways

Benefits for teachers

- Inquiry learning unit and resources
- In-person experiences delivered by STEM professionals
- Innovative culminating projects
