

# That's my Water!

## Millner Primary School saves big on water

Power and Water's That's My Water! program has helped Millner Primary School reduce its water use by an impressive 46%. Our experts worked with the school to achieve this significant reduction by undertaking a water efficiency audit, implementing a new irrigation schedule and providing technical assistance with smart irrigation.

Water usage reduced from **131,000 litres per day** down to **60,000 litres per day**

Water bill reduced from **\$8000 per month** down to **\$3000 per month**

### That's My Water! program benefits

#### Curriculum-aligned learning

Students work alongside Power and Water STEM professionals, addressing the issue of water sustainability. Learning areas across science, geography and art are brought to life through real world challenges facing the Territory via an engaging educational experience tailored to age and location.

#### Free school water efficiency audit

Our team will undertake a free water efficiency audit. We analyse your school's water use, uncover whether there are any leaks and identify where we can help you to save on your water use.

#### Save water – save money

That's My Water is helping schools to significantly reduce their water usage, unlocking funds that can be prioritised elsewhere in the school.

#### Improve the appearance of your school grounds

Our experts will support your ground staff with smart irrigation and scheduling – ensuring you can maintain the appearance of your school while running an efficient watering program.

#### Upskill your school community

We'll run a professional development session for your staff outlining how to improve water efficiency. Your school will gain technical knowledge about smart irrigation and your students will become valuable water champions who are always on the lookout for leaks!

#### Become a sustainability leader

Demonstrate how your school is playing a tangible role in ensuring we have enough water for the Territory's future.

#### That's My Water!

More than 4800 students and 37 schools have participated in That's My Water! Limited places available in 2024. Register your interest [here](#).
